

# Year 8 Technology—3D Letterforms—Homework

**WALT:** In lessons you are making a 3D letterform product for a children's bedroom. For your homework, you need to **design the packaging** for your product. Imagine your product is to be sold in a shop, how would it be sold, what would the packaging look like, what would be on the packaging? E.g. name of the product, brand, price etc.

**WILF:**

- ⇒ Consider the shape and size of your packaging. Would you be able to see your 3D letter through a clear 'window' at the front of the packaging.
- ⇒ Consider what your packaging would be made of. Is it cost effective?
- ⇒ You could draw your packaging from multiple angles or create different designs in the space below.
- ⇒ You could add colour to your design.
- ⇒ Add notes to explain your choices, materials etc.
